

Hotels & Lodges

With Wood Burning Fireplaces

Guests at hotels and lodges across the country are burning thousands of tons of wood in wood burning fireplaces every year. This is creating a significant pollution and air quality problem. However, this is a problem that you can solve and become even "Greener".

Hotel lobby fireplace with HearthCAT

The **HearthCAT** from Healthy Hearth provides an affordable solution for all hotels and lodges to eliminate the wood smoke and pollution from their wood burning fireplaces.

The **HearthCAT** Technology in a Fireplace

There is nothing else in the world like the **HearthCAT**. The technology is recommended by the US Environmental Protection Agency. Contact information enclosed!

NOW YOU CAN ELIMINATE THE SMOKE FROM YOUR FIREPLACES

Your Hotel is Not
Green Unless Your
Wood Burning
Fireplaces are
Green

Healthy  Hearth

Eliminate Pollution

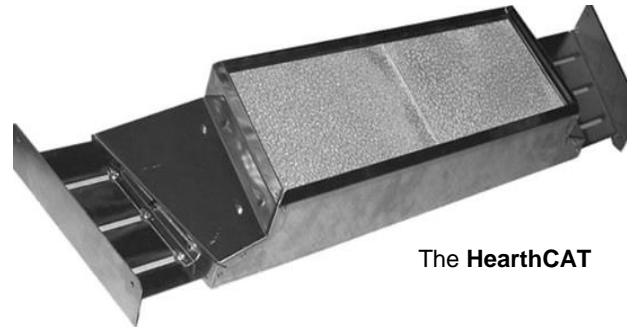

Double the Heat

Invisible in the Fireplace

Wood smoke emissions from fireplaces are currently among the most significant health risks in the US. The **HearthCAT** Fireplace Technology is the only passive solution for the reducing harmful emissions from wood burning fireplaces. New regulatory standards from many states and local air districts will require wood burning fireplaces at hotels and lodges to meet new stricter wood smoke emission requirements.

The **HearthCAT**

- ❖ EPA Phase II Qualified
- ❖ No Power Required
- ❖ Not Visible to the Homeowner
- ❖ No Maintenance Required
- ❖ No Moving Parts
- ❖ Projected Catalytic Life of 10 Years
- ❖ Easily removed for Chimney Cleaning
- ❖ Affordable Technology
- ❖ Doubles the Heating Efficiency of the Fireplace

Reduce Particulates by at Least 80%

According to U.S. Environmental Protection Agency, there are over 40 million existing unregulated wood burning fireplaces that continue to pollute the air we breathe. The **HearthCAT** Retro-Fit System for wood burning fireplaces is the solution to this major environmental problem.

The **HearthCAT** Retro-Fit Technology reduces harmful wood smoke particulate pollution by 80% while reducing VOC's and carbon monoxide by 90%. It's easily installed and actually increases the heating efficiency of the wood burning fireplace. The perfect solution for reducing wood burning fireplace smoke & pollution at green hotels and lodges.
